POINT to POINT GAP TRANSPORTERS

New Product

Heavy Duty Construction

**Adjustable For Many
Bottle Sizes**

Fully Guarded

**High Efficiency
AC Motors**

Features

- Heavy Duty Frame Construction
- Adjustable Contact Parts
- Nema 12 Electrics W/ Variable Speed Control
- Adjustable For Many Sizes
- Fully Guarded System
- Heavy Duty Belts
- Label or Coder Access Across the Transfer Area

Benefits

- Low Maintenance & Operating Cost
- Designed With Common Parts For Easy Use
- Adaptable To Fit A Variety Of Bottle, Puck Sizes and Configurations
- Designed with High Efficiency AC Motors
- Easy to Install

Options

- Stainless Steel Conveyors
- Nema 4 Electrics
- Control Package Available
- Stainless Steel Construction
- Configurations to Go Through Wall Openings

ENGINEERED FOR RELIABILITY & DEPENDABILITY

Packaging Dynamics Ltd. introduces the Point to Point Gap Transporter (SL-GT) which utilizes a compact design to transfer with smooth motion and a low profile.

Our design utilizes two rotating heavy duty belts driven by high efficiency motors that move pucks and bottles across gaps and transfers safely without bumping or spilling.

Our design can be custom made to fit any existing conveyor or machine line.

The system is fully guarded and safe to use and has been proven to maximize production by minimizing dead plate zones.

This transporter reduces the amount of transfer plates and traffic in a line and adds to the long term reliability and consistency of the overall system.

Custom conveyors are also available to use with our system for loading and unloading areas as well as Accumulation and Unscrambler Tables to complete any line configuration.

Specifications

DESCRIPTION

Container Size	Pucks/Bottles/Containers
Construction	Stainless Steel and/or Aluminum
Overall Dimensions	10.0"H x 34.0"W x 8.0"D
Weight	Approximately 50 lbs.
Belt Carry Weight	Approximately 3 lbs. per Item
